

Statewide Civil Caseload Composition in 26 States, 2016

\* Single-tiered court system

The composition of Civil cases varies from state to state. Sorted by percent of contract cases, Kansas has the highest proportion of contract cases at 76 percent with just over 3 percent small claims. Conversely, North Carolina reports only 10 percent contract but 40 percent small claims. Kansas has a \$4,000 limit for small claims cases versus North Carolina's \$10,000 limit, which may help to explain some of this difference.
