

Statewide Tort Caseload Composition in 20 States, 2016

\* Single-tiered court system

Other Tort include intentional torts, premises liability, slander/libel, and other torts.

When the tort caseloads from these 20 states are disaggregated, they appear more similar to each other than do contract caseloads. Automobile torts represent more than half the tort caseload in 13 of the 20 states, and malpractice and product liability cases never combine for more than 12 percent of any one state's tort caseload.
